Important information STLWS 1 - 4

Technical details:

Power supply: 110-240 V / 50-60 Hz

Bulb socket: E27

Protection class: I

Maximum wattage (thermal):

3 x 75 W

Recommended bulbs:

energy-saving bulb 15 W

Note:

This specified maximum wattage applies to conventional bulbs. Since these have however been off the market since 01.09.2009, we recommend energy-saving bulbs with about 1/5 of the specified wattage.

Halogen bulbs are not suitable because these become much hotter than conventional bulbs.

Safety instructions:

- Never cover the luminaire with a cloth – fire hazard!
- Always ensure that the plug is removed from the socket before working on the luminaire or changing the bulb.
- Have repair work performed only by an authorized electrician, because electrical power can cause severe injuries!
- Please note the specified maximum wattage of the bulbs.

**Fitting too strong a bulb may lead to discolouring
of the lampshade and fire hazard!**

Care of lamp:

Over the course of time, the nickel-plated brasswork develops a silvery patina, which many find attractive. However, if for optical reasons you wish the surface to preserve its nickel shine, please use a polish which contains NO abrasive additives.

Clean the upper side of the lampshade using a dry cloth and without exerting any pressure. The inside of the lampshade can be cleaned with a damp cloth.

For cleaning the painted foot plate use a damp micro fibre cloth.

Mounting the footplate:

Please note the leaflet enclosed with the footplate:

“Assembly instructions for the footplate STLWS 1 – 4”

Lampshade:

Please note the leaflet enclosed with the lampshade:

“Important information on the lampshades”
